

250KG / 400KG POWER HOIST

MODEL NO: PH250.V4/PH400.V3

Thank you for purchasing a Sealey product. Manufactured to a high standard, this product will, if used according to these instructions, and properly maintained, give you years of trouble free performance.

IMPORTANT: PLEASE READ THESE INSTRUCTIONS CAREFULLY. NOTE THE SAFE OPERATIONAL REQUIREMENTS, WARNINGS & CAUTIONS. USE THE PRODUCT CORRECTLY AND WITH CARE FOR THE PURPOSE FOR WHICH IT IS INTENDED. FAILURE TO DO SO MAY CAUSE DAMAGE AND/OR PERSONAL INJURY AND WILL INVALIDATE THE WARRANTY. KEEP THESE INSTRUCTIONS SAFE FOR FUTURE USE.

1. SAFETY

1.1. ELECTRICAL SAFETY

- ☐ **WARNING!** It is the user's responsibility to check the following:
 - ✓ Check all electrical equipment and appliances to ensure that they are safe before using.
 - ✓ Inspect power supply leads, plugs and all electrical connections for wear and damage.
 - ✓ Ensure that the insulation on all cables and on the appliance is safe before connecting it to the power supply.
 - ✗ **DO NOT** use worn or damaged cables, plugs or connectors.
 - ✓ Ensure that any faulty item is repaired or replaced immediately by a Sealey qualified technician.
 - ✓ If the cable or plug is damaged during use, switch off the electricity supply and remove from use.
 - ✓ Sealey recommend that an RCD (Residual Current Device) is used with all electrical products.
- Important:** Ensure that the voltage rating on the appliance suits the power supply to be used and that the plug is fitted with the correct fuse.
- ✗ **DO NOT** pull or carry the appliance by the power cable.
- ✗ **DO NOT** pull the plug from the socket by the cable.

1.2. GENERAL SAFETY

- ☐ **WARNING!** Ensure Health & Safety, local authority, and general workshop practice regulations are adhered to when using this equipment.
- ✓ Familiarise yourself with the application, limitations and potential hazards of the hoist.
- ☐ **WARNING!** Disconnect the hoist from the mains power before changing accessories, servicing or performing any maintenance.
- ✓ Maintain the hoist in good condition (use an authorised service agent).
- ✓ Replace or repair damaged parts. Use genuine parts only. Unauthorised parts may be dangerous and will invalidate the warranty.
- ✓ Locate hoist in a suitable work area, keep area clean and tidy and free from unrelated materials. Ensure that there is adequate lighting.
- ☐ **WARNING!** Ensure that the mounting for the hoist is capable of supporting the rated capacity of the hoist (plus the weight of the hoist) without failure and that the hoist is mounted horizontally.
- ✓ Keep the hoist clean for best and safest performance and check moving parts alignment regularly.
- ✓ Remove ill fitting clothing. Remove ties, watches, rings and other loose jewellery and contain and/or tie back long hair.
- ✓ Keep children and unauthorised persons away from the work area.
- ✓ Ensure the load is correctly secured before operating the hoist.
- ✓ Keep hands away from the cable reel when winding the hoist in.
- ✗ **DO NOT** use the hoist for any purpose other than that for which it is designed.
- ✗ **DO NOT** operate the hoist if any parts are damaged or missing as this may cause failure and/or possible personal injury.
- ✗ **DO NOT** exceed the rated capacity of the hoist.
- ✗ **DO NOT** adjust or tamper with the maximum lift cut-out mechanism.
- ✗ **DO NOT** use the hoist out of doors.
- ✗ **DO NOT** get the hoist wet or use in damp or wet locations or areas where there is condensation.
- ✗ **DO NOT** allow untrained persons to operate the hoist.
- ✗ **DO NOT** operate the hoist when you are tired or under the influence of alcohol, drugs or intoxicating medication.
- ✗ **DO NOT** use the hoist where there are flammable liquids, solids or gases such as paint solvents, etc.
- ✗ **DO NOT** attempt to lift angled loads or to drag loads with the hoist. The centre of gravity of the load must always be directly below the hoist.
- ✗ **DO NOT** allow the load to swing beneath the hoist.
- ✗ **DO NOT** allow a raised and supported load to fall and thus shock load the mounting, hoist, cable and hook.
- ✗ **DO NOT** use more than one hoist to lift a load.
- ✗ **DO NOT** leave the hoist unattended with a suspended load.
- ✗ **DO NOT** wrap the hoist cable around the load.
- ✗ **DO NOT** use the hoist to lift dangerous materials.
- ✗ **DO NOT** use the hoist to lift people.
- ✓ Use a qualified person to lubricate and maintain the hoist.
- ✓ When not in use and before carrying out repairs/maintenance isolate the hoist from the power supply.
- ▲ **DANGER!** Ensure that personnel are prevented from passing beneath the hoist and load.

2. INTRODUCTION

Approved to EU and UK Lifting Gear Regulations. These hoists are intended for use where a suitable support facility exists. Support brackets are included with the equipment.
The support bar is not included.

3. SPECIFICATION

Model no	PH250.V4/PH400.V3
Capacity double cable	250kg/400kg
Capacity single cable	125kg/200kg
Current	2.2A/3.3A
Group of mechanisms	M1
Lift height double cable	6m
Lift height single cable	12m
Lift speed (max)	8m/min
Minimum rope tensile strength	1870N/mm ² /1770N/mm ²
Motor power	500W/750W
Power Supply Cable Length:	1.3m
Rope diameter	3mm/3.8mm
Voltage	230V~50Hz
Work rate	S3

4. MOUNTING

- 4.1. Unpack the hoist and check contents against the items listed below.
Should there be any damaged or missing parts contact your supplier immediately.
Contents
1. Hoist assembly.
 2. Double line pulley and hook (loosely assembled).
 3. Four each of: bolts, spring washers and washers.
 4. Two mounting brackets.
- 4.2. Ensure that the selected hoist support is sufficiently strong and will also hold the hoist in a horizontal position. If alternative mounting brackets are fabricated, ensure that these are at least as strong as those provided, and align with the mounting holes (fig.1.A) in the hoist.

5. OPERATION

- ❑ **WARNING!** Before using the hoist ensure that you have read, understood and apply the safety instructions in Section 1.
IMPORTANT: In an emergency press the emergency stop button to halt the hoist (fig.2.7), to release the emergency stop button, turn it clockwise.
- 5.1. Ensure that the load to be lifted is directly below the hoist and that any lifting straps, ropes or chains being used are capable of supporting the weight.
- 5.2. With mains power switched on, operate control switch (fig.2.1) to bring hook to load height. Press lower half of switch to lower hook and upper half to raise hook. Release switch to stop hoist.
- 5.3. Attach hoist hook (fig.2.2) to load, ensuring that safety bar (fig.2.3) is fully closed
- 5.4. Use control switch (fig.2.1) to raise or lower the load to the required height.
- 5.5. To carry out a double line lift, first hook the single line hook in aperture in hoist frame (fig.3.1). Then take double line pulley and hook (fig.3.2), remove 'R' pin, shaft and washers and undo nyloc nuts and remove small bolts (fig.3.3). Place pulley on cable loop between hoist drum and single line hook. Replace hook and refit shaft, washers and 'R' pin, then refit small bolts and tighten the nyloc nuts on them. Ensure that pulley is free to rotate. Proceed as above in 5.1. to 5.4.
- Notes: 1. It is important not to completely empty the cable drum, it is designed so that if the cable is run out to it's end, the cable will engage with the safety bar (fig.2.6) and cut the motor out, and there will still be sufficient windings on the drum. If however the cable is being pulled out of the hoist at an angle, it may not engage with the safety bar, so caution is needed in this situation.
2. In order to prevent the motor/gearbox from overheating, the hoist should not be operated for longer than four minutes at any one time. Any period of use should be followed by a similar period with the hoist at rest.
3. Do not wind loose cable onto drum - ensure that cable is always under tension.

fig.2

fig.3

6. MAINTENANCE

- 6.1. The hoist should be thoroughly checked over at regular intervals to ensure that it is undamaged and is functioning correctly.
- 6.2. Isolate from the power supply and inspect the following for any signs of damage, wear or looseness, as appropriate:
- | | |
|----------------------------------|----------------------------|
| a) Lifting cable | d) Mounting brackets/bolts |
| b) Electrical cables/connections | e) Support structure |
| c) Control switch | |
- Rectify any faults that are found, before using the hoist again.
- 6.3. Reconnect to power supply and check for correct operation of the control switch and the maximum lift cut-out switch - the hoist should stop when the counterweight (fig.2.4) lifts the cut-out arm (fig.2.5).

WEEE REGULATIONS

Dispose of this product at the end of its working life in compliance with the EU Directive on Waste Electrical and Electronic Equipment (WEEE). When the product is no longer required, it must be disposed of in an environmentally protective way. Contact your local solid waste authority for recycling information.

ENVIRONMENT PROTECTION

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycling centre and disposed of in a manner which is compatible with the environment. When the product becomes completely unserviceable and requires disposal, drain any fluids (if applicable) into approved containers and dispose of the product and fluids according to local regulations.
