Hazardous Substance Cabinet

This cabinet is designed to store hazardous substances.
The following guidelines should be noted prior to using the cabinet.

This cabinet is designed for floor standing, or on an appropriate raised surface, or in conjunction with a purpose made floor stand (optional extra) to raise smaller cabinets to a manageable height.

Risk Assessment

It is important that a risk assessment is carried out to establish that the cabinet is suitable for the intended application.

Spillage Sump Tray

The spillage pump is an integral part of the cabinet base.
The sump must NOT be used for storage.

Shelf Design - Important

The shelves have a recessed lip designed to contain the spillages of substances around the edge of the shelf, it is notched at each corner to allow spillages to drain to the sump below.

Shelf Positions

Storage shelves are adjustable in height and should be supported on support clips provided. The lowest shelf should be positioned directly above the sump base but allowing access for mopping up should there be a spillage. All other shelves can be positioned at any height to suit items being stored.

Cleaning

The cabinet has a powder coated finish which should be cleaned at regular intervals.
